

DEADLINE[®]

Fluorescent Tracking Gel Yellow

Tracking gel for rat and mouse detection

FOR PROFESSIONAL USE ONLY.

DIRECTIONS FOR USE: Make sure the surface is free from dust and dirt before application. Squeeze a suitable amount of product onto the treatment surface and spread liberally using a clean paint brush or spatula. Gel can be used on horizontal and vertical surface. To aid visibility use UV torch to highlight track marks.

NOTES: Any residue can be removed using a suitable cleaning agent. Brushes and spatulas can be cleaned using warm soapy water. Apply product in areas where rodent activity is suspected, away from direct food contact surfaces.

Safety data sheet available on request. Contains Methylchloroisothiazolone and Methylisothiazolone. May produce an allergic reaction.

Batch No: See pack

200ml
